běžná cena 4.840 Kč vč. DPH
v této nabídce **3.880 Kč** vč. DPH
(tato cena platí při objednání titulu do 31.7.2017)

Neuroscience is an evolving, complex, and multidisciplinary field of medicine. Neuroradiologists and neuropathologists are an important part of the multidisciplinary team in addition to neurosurgeons, neurologists, and other disciplines. Featuring over nine hundred images, this practical textbook and atlas combines the specialties of neuroradiology and neuropathology, providing an extensive understanding of the disease process.

It offers a comprehensive review of the nervous system diseases, including eye, skeletal muscle, and bone and soft tissue diseases. Topics are covered in chapters arranged by region, allowing for quick reference of conditions such as brain tumors, spinal cord diseases, or congenital malformations. Introductory chapters on pathologic and radiologic techniques are also featured, enabling specialists of both areas to familiarize themselves with the other's subject.

Packaged with a password to give the user online access to all the text and images, this is a must-have resource for comprehensive and accurate diagnosis.
