

Připravili jsme pro Vás zvýhodněnou cenovou nabídku na titul, který právě vychází v červnu 2017:

Biostatistics for Animal Science

autoři Miroslav Kaps, William R. Lamberson
v měkké vazbě, 568 stran
vyd. CABI Publishing, 3.vydání, VI/2017
ISBN 9781786390356

běžná cena 1.500 Kč vč. DPH
v této nabídce **1.220 Kč** vč. DPH
(tato cena platí při objednání titulu do 31.7.2017)

Designed to cover techniques for analysis of data in the animal sciences, this popular textbook provides an overview of the basic principles of statistics enabling the subsequent applications to be carried out with familiarity and understanding. Each chapter begins by introducing a problem with practical questions, followed by a brief theoretical background. Most topics are followed up with numerical examples to illustrate the methods described using data-sets from animal sciences and related fields.

The same examples are then solved using the SAS software package. Key features of this third edition: - Updated throughout, and covers a wealth of new distributions and new material on non-normal dependent variables - Improved clarity of text and examples - Includes both basic techniques and more complex procedures to provide an essential resource whatever your level - Contains exercises and many worked examples in SAS. Written primarily for students and researchers in animal sciences, the text is also useful for those studying agricultural, biological, and veterinary sciences.
