

Připravili jsme pro Vás zvýhodněnou cenovou nabídku na titul, který právě vychází v prosinci 2017:

## Handbook of Optoelectronics 3 Volumes

editoři John P. Dakin, Robert G. W. Brown  
v pevné vazbě, 2192 stran  
vyd. Apple Academic Press, 2.vydání, XII/2017  
ISBN 9781482241723

běžná cena 12.500 Kč vč. DPH  
v této nabídce **9.490 Kč vč. DPH**  
(tato cena platí při objednání titulu do 31.1.2018)

### Features

- Provides a complete overhaul of the original edition, with extensive updates and many new contributions
- Adds a new section devoted to applications in commercially important areas, including biomedicine, transport, energy, oil and gas, and security
- Covers key topics such as nanophotonics, latest developments in LED lighting, VCSELs, and laser diodes
- Presents coherent and easy-to-follow overviews of exciting new technologies, including solar cells, chemical and biological sensors, flexible displays, and 3D data storage devices
- Contains contribution from experts around the globe

*Handbook of Optoelectronics* offers a self-contained reference from the basic science and light sources to devices and modern applications across the entire spectrum of disciplines utilizing optoelectronic technologies. This second edition gives a complete update of the original work with a focus on systems and applications.

No other resource in the field comes close to its breadth and depth, with contributions from leading industrial and academic institutions around the world. Whether used as a reference, research tool, or broad-based introduction to the field, the *Handbook* offers everything you need to get started.
