běžná cena 4.060 Kč vč. DPH
v této nabídce **3.330 Kč** vč. DPH
(tato cena platí při objednání titulu do 31.5.2018)

This comprehensive yet practical text reviews the pathology of neoplastic and non-neoplastic conditions of the pleura and peritoneum, with a particular focus on mesothelioma. The anatomy and embryology of serous membranes are discussed, and the causes, epidemiology, and clinical and radiologic features of malignant mesothelioma are reviewed. A comprehensive review of immunostains used for diagnosing serous membrane lesions is given, current treatment options for patients are outlined.

The markers of asbestos exposure and their significance are also assessed. The pathology of non-neoplastic conditions of serous membranes, from peritoneal cysts and endometriosis to decidualis and gliomatosis peritonei are also covered, as are lymphomas and soft tissue tumors in serous membranes. This makes Practical Pathology of Serous Membranes an essential resource for effective diagnosis.
