

Připravili jsme pro Vás zvýhodněnou cenovou nabídku na titul, který vyšel v září 2017:

Encyclopedia of Sustainable Technologies

autor Martin Abraham
v pevné vazbě, 2262 stran
vyd. Elsevier, IX/2017
ISBN 9780128046777

běžná cena 44.600 Kč vč. DPH
v této nabídce **33.600 Kč** vč. DPH
(tato cena platí při objednání titulu do 31.5.2019)

Encyclopedia of Sustainable Technologies provides an authoritative assessment of the sustainable technologies that are currently available or in development. Sustainable technology includes the scientific understanding, development and application of a wide range of technologies and processes and their environmental implications. Systems and lifecycle analyses of energy systems, environmental management, agriculture, manufacturing and digital technologies provide a comprehensive method for understanding the full sustainability of processes.

In addition, the development of clean processes through green chemistry and engineering techniques are also described. The book is the first multi-volume reference work to employ both Life Cycle Analysis (LCA) and Triple Bottom Line (TBL) approaches to assessing the wide range of technologies available and their impact upon the world. Both approaches are long established and widely recognized, playing a key role in the organizing principles of this valuable work.
