Připravili jsme pro Vás zvýhodněnou cenovou nabídku na titul, který právě vychází v dubnu 2014:

**Multivariate Analysis of Ecological Data using CANOCO 5**

autoři Petr Šmilauer, Jen Lepš
v měkké vazbě, 352 stran
vyd. Cambridge University Press, 2.vydání, IV/2014
ISBN 9781107694408

běžná cena 1.558 Kč vč. DPH
v této nabídce **1.280 Kč vč. DPH**
(tato cena platí při objednání titulu do 22.5.2014)

This revised and updated edition focuses on constrained ordination (RDA, CCA), variation partitioning and the use of permutation tests of statistical hypotheses about multivariate data. Both classification and modern regression methods (GLM, GAM, loess) are reviewed and species functional traits and spatial structures analysed. Nine case studies of varying difficulty help to illustrate the suggested analytical methods, using the latest version of Canoco 5. All studies utilise descriptive and manipulative approaches, and are supported by data sets and project files available from the book website: http://regent.prf.jcu.cz/maed2/. Written primarily for community ecologists needing to analyse data resulting from field observations and experiments, this book is a valuable resource to students and researchers dealing with both simple and complex ecological problems, such as the variation of biotic communities with environmental conditions or their response to experimental manipulation.
