běžná cena 19.561 Kč vč. DPH
v této nabídce **15.990 Kč vč. DPH**
(tato cena platí při objednání titulu do 9.8.2014)

Still the most comprehensive reference source on the development, production and therapeutic application of antibodies, this second edition is thoroughly updated and now has 30% more content. Volume I covers selection and engineering strategies for new antibodies, while the second volume look at novel therapeutic concepts and antibodies in clinical trial phases, as well as their potential. Volume III features detailed and specific information about each antibody currently approved for therapeutic purposes, including the clinical data.

Beyond providing current knowledge, the authors discuss emerging technologies, future developments, and intellectual property issues, such that this handbook meets the needs of academic researchers, decision makers in industry and healthcare professionals in the clinic.
